

Neutrino energy

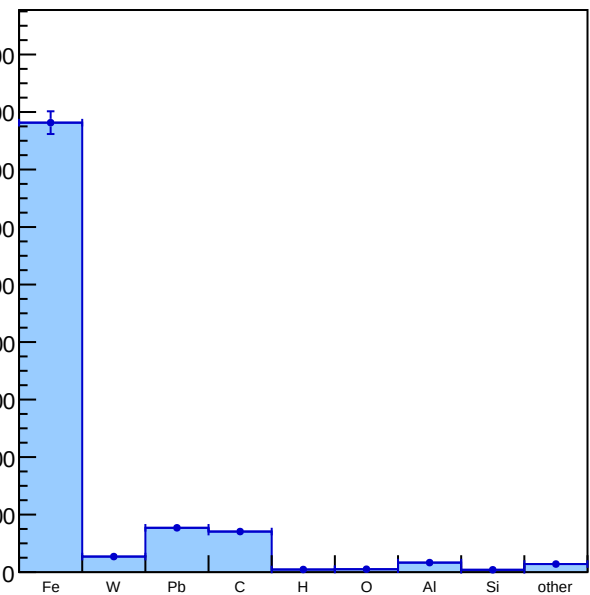

Neutrino flavour

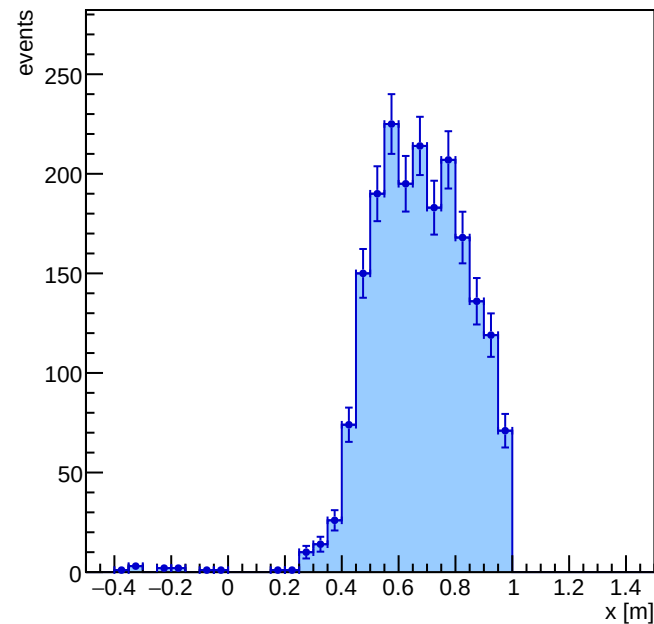

Scattering process

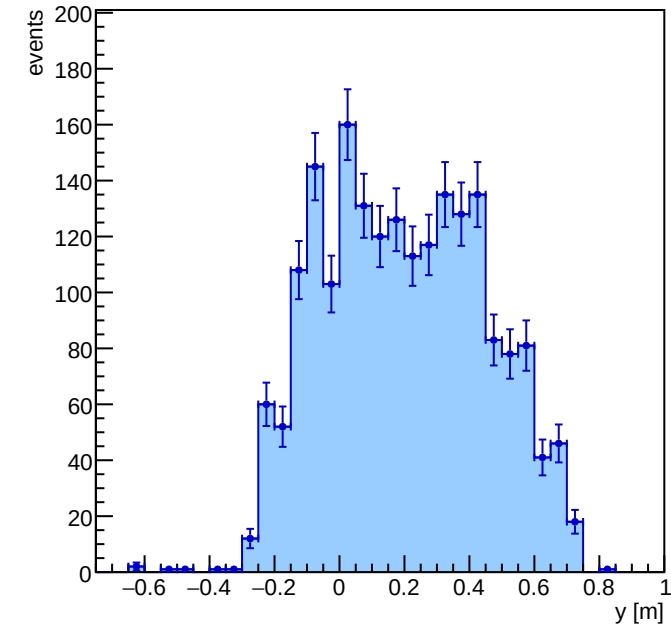

Target nucleus

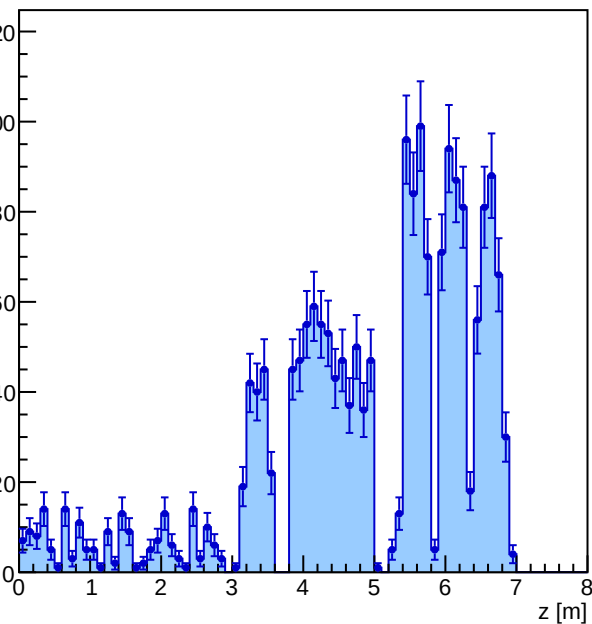

Vertex x

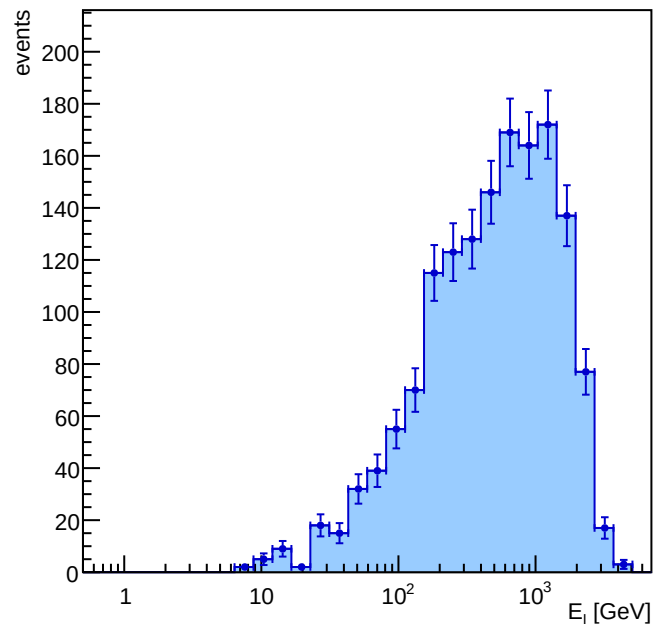

Vertex y

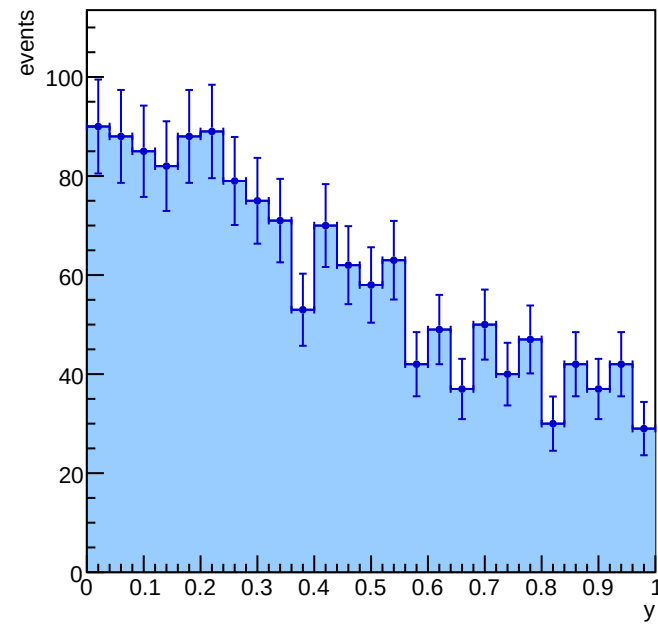

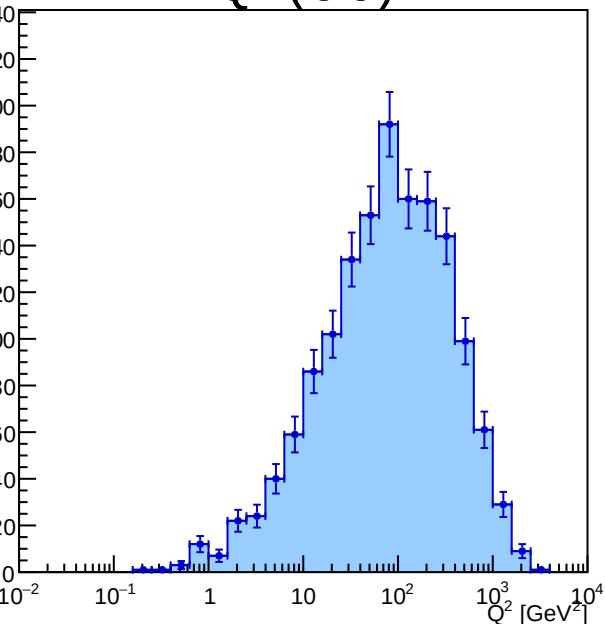

Vertex z

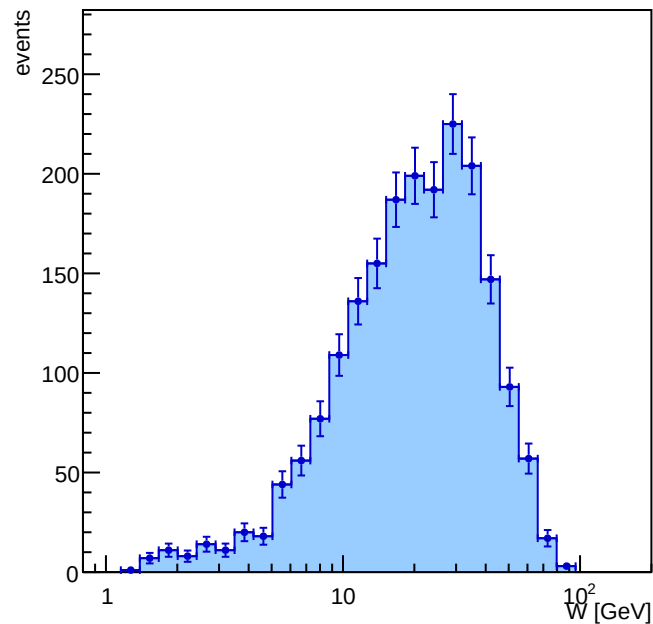

Primary lepton energy (CC)

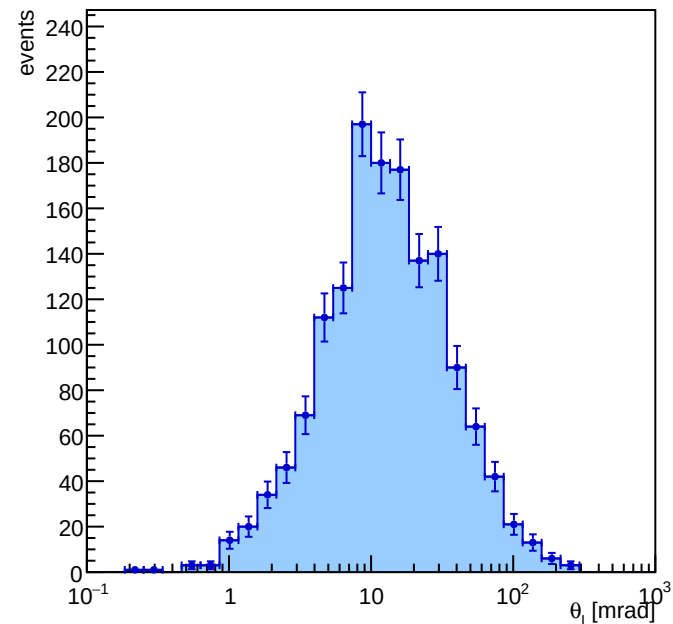

Inelasticity y (CC)

 Q^2 (CC)

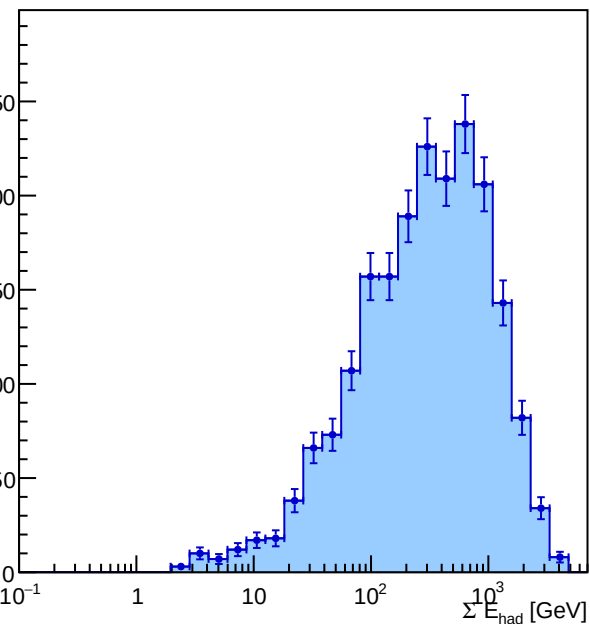

Hadronic invariant mass W

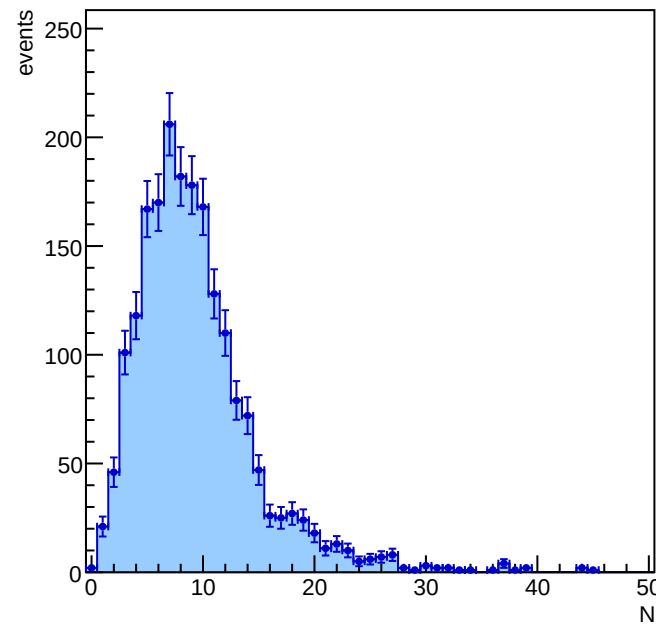

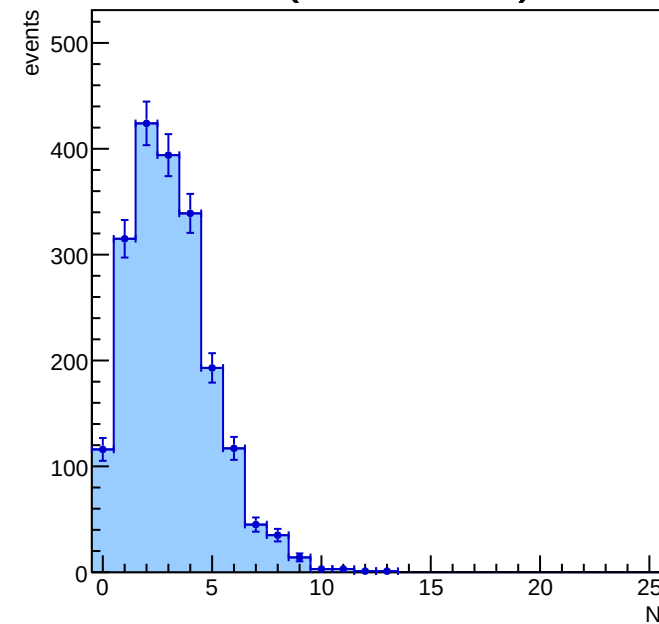

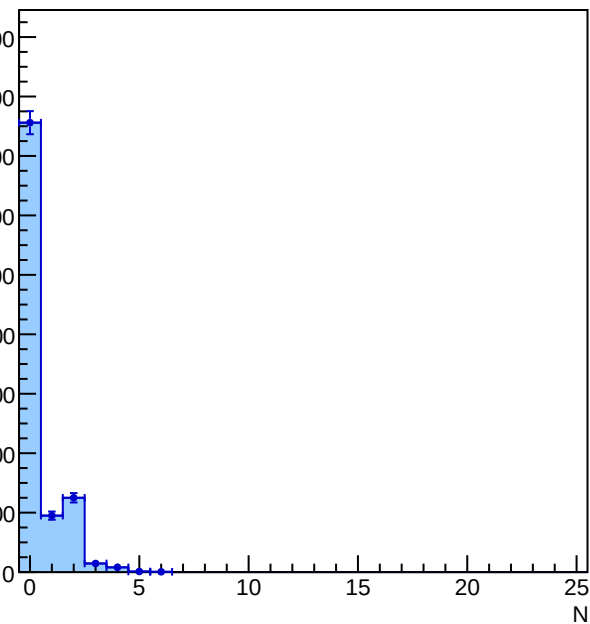

Primary lepton angle (CC)

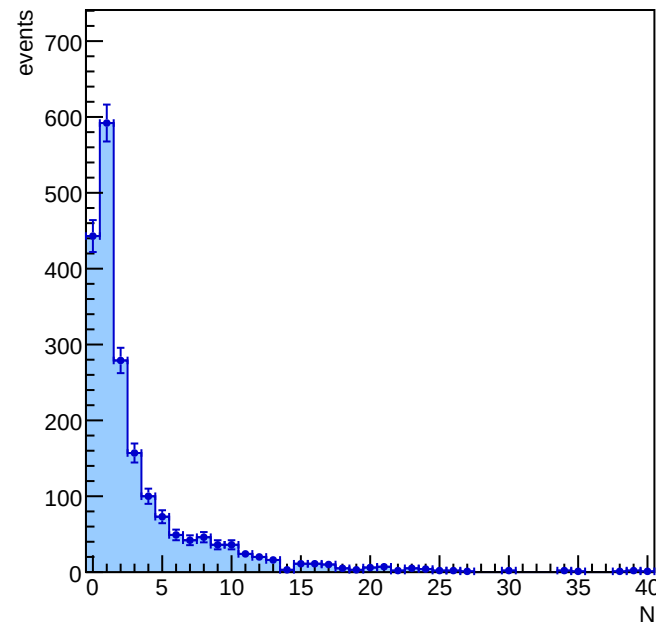

Final-state hadron energy

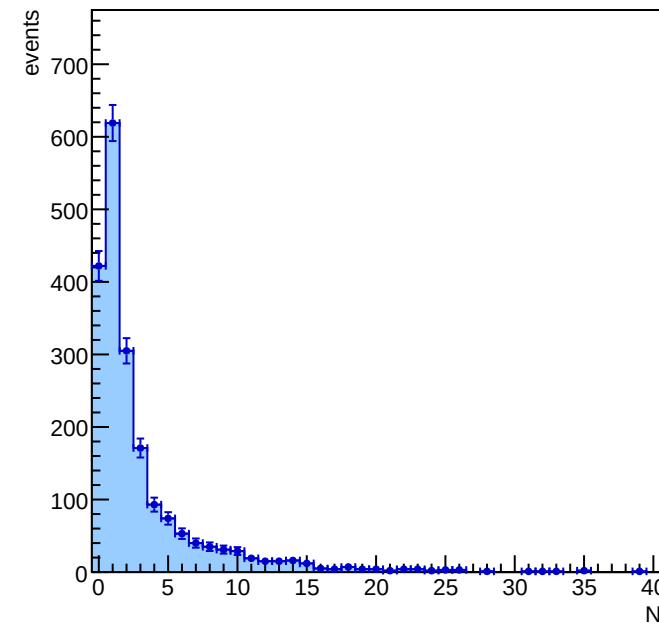

Charged hadrons (final state)

 π^0 (final state) γ (final state)

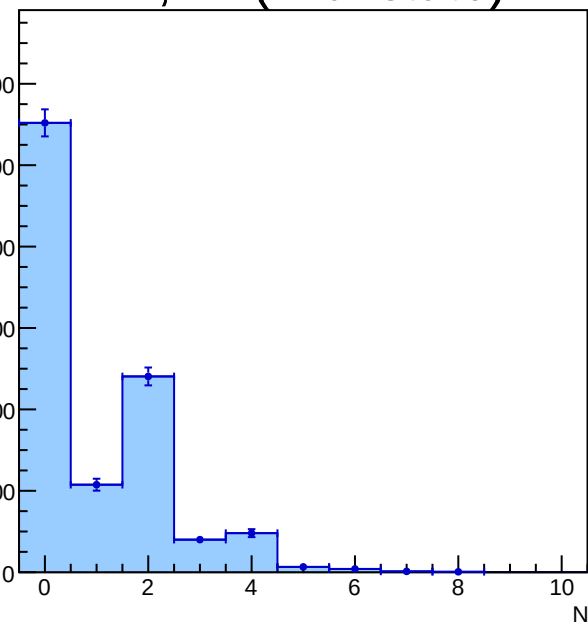

Neutrons (final state)

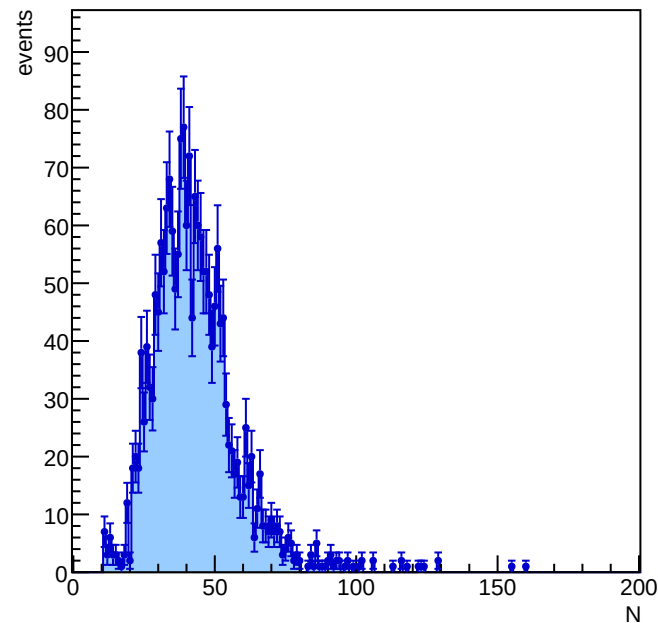

Protons (final state)

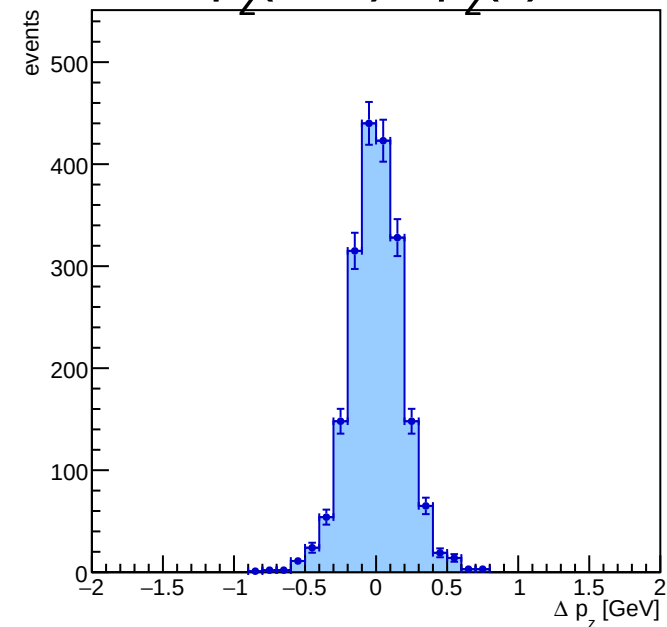

$K^\pm, K^0$ (final state)

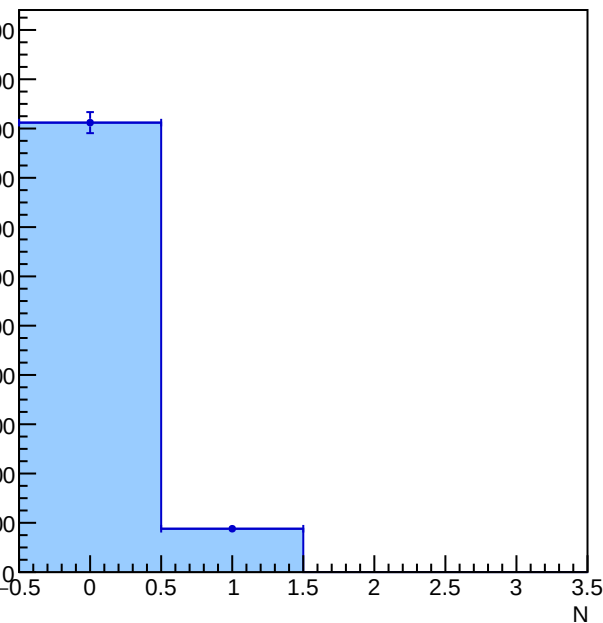

Particles in the event record

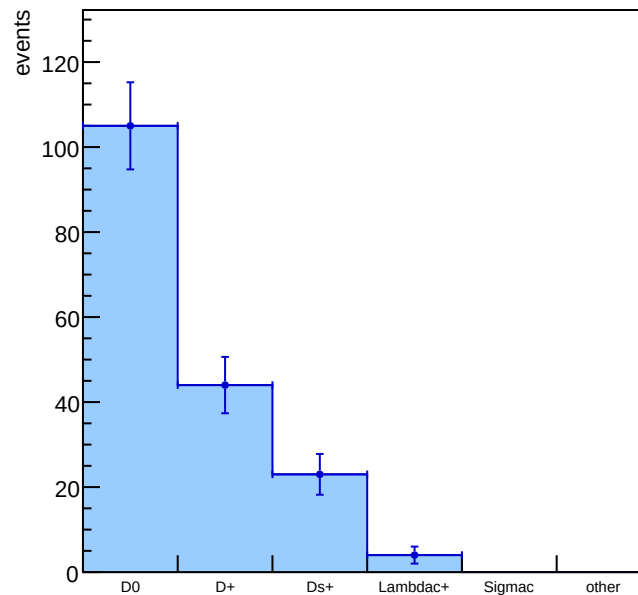

$p_z(\text{final}) - p_z(v)$

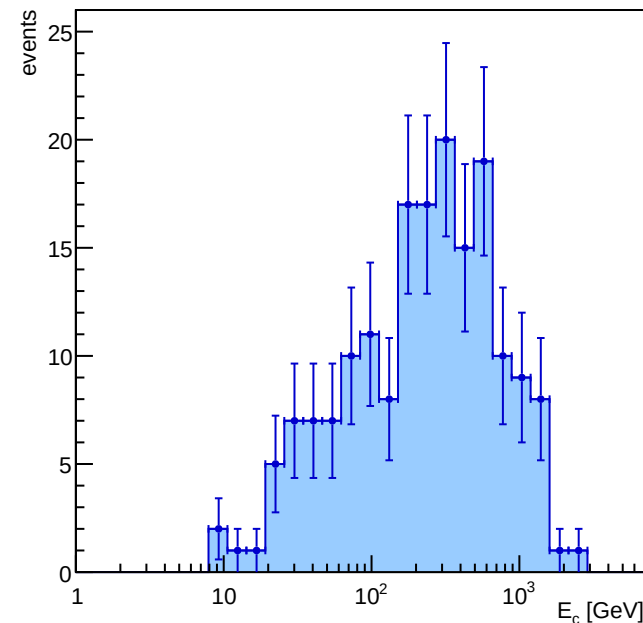

Charm hadrons per event

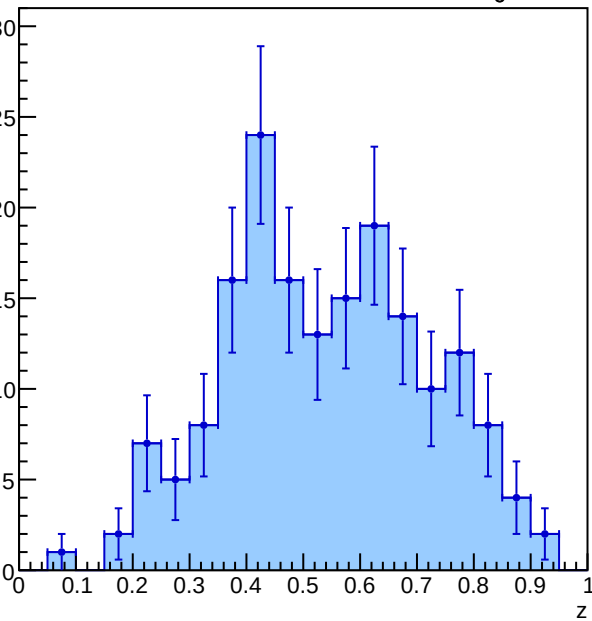

Charm hadron species

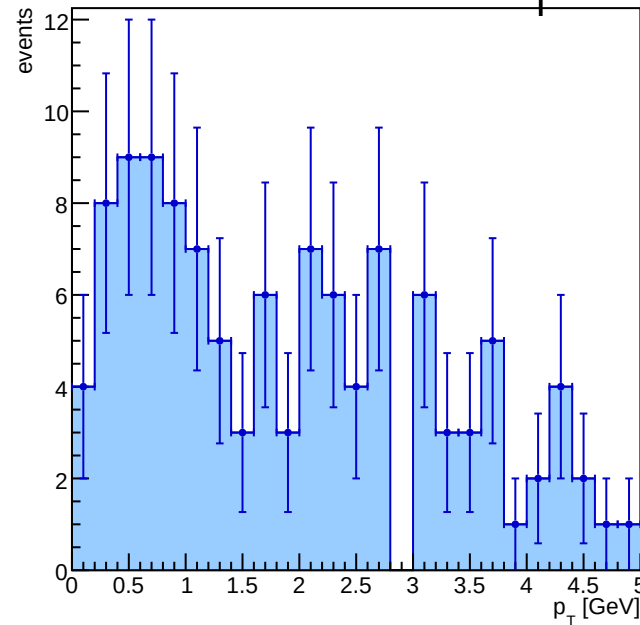

Charm hadron energy

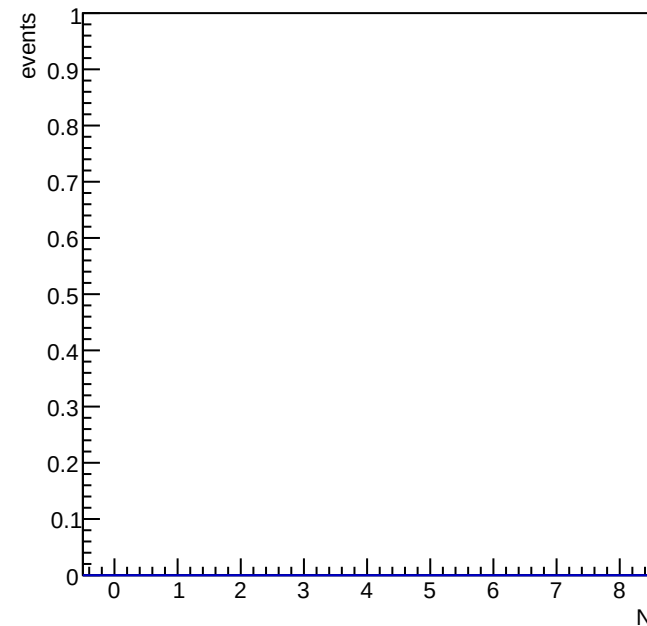

Charm energy fraction $z = E_c/\nu$

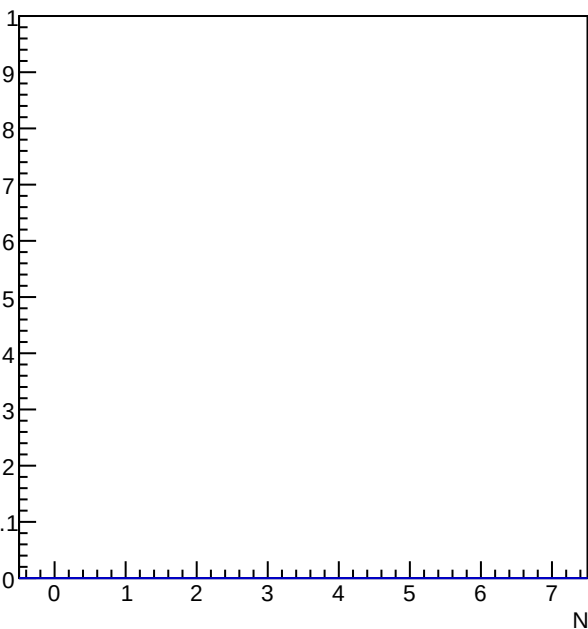

Charm hadron p_T

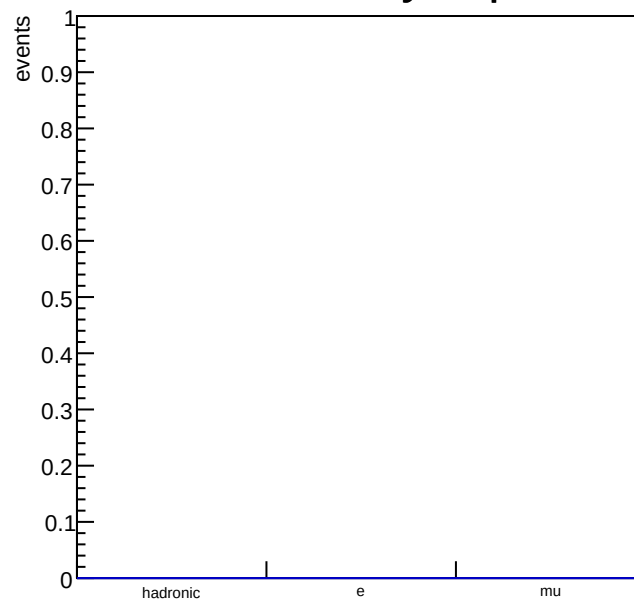

Charm decay: daughters

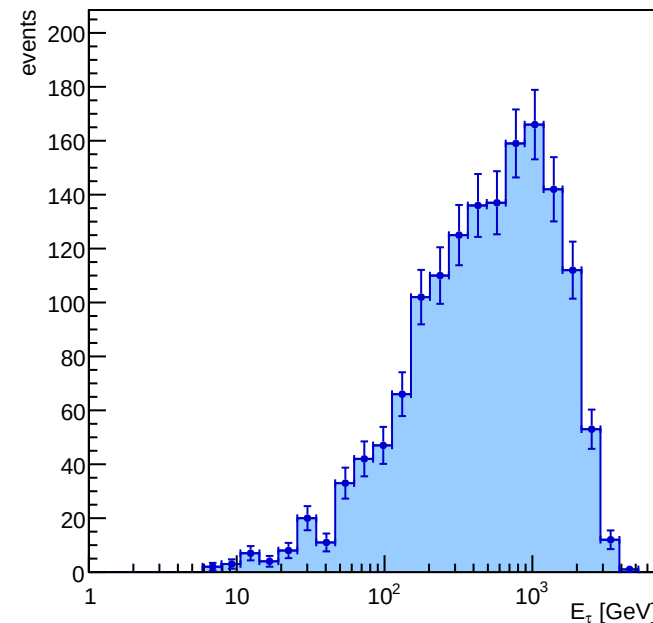

Charm decay: charged daughters

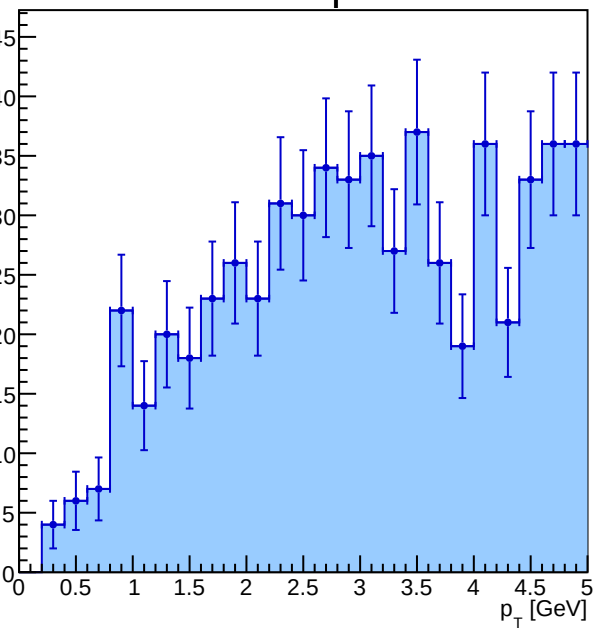

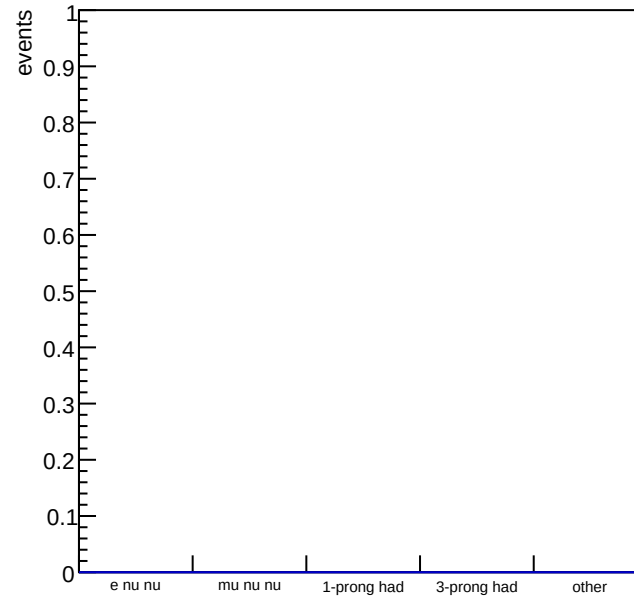

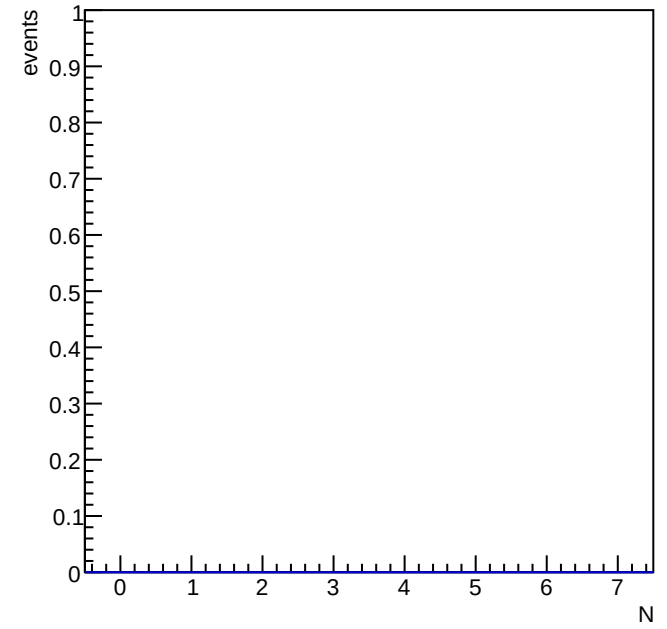

Charm decay: lepton

τ energy

τp_T  τ decay mode τ decay: charged daughters τ decay: visible energy fraction
